

BREASTFEEDING WRAPPING STYLE

INSTRUCTIONS

Hello, my name is Monique. Breastfeeding discreetly is very important to me. My Tulips & Tea baby wrap has helped me to breastfeed anywhere, any time.

I advise that you inspect your wrap prior to use for any signs of damage to the material which may compromise the integrity of your wrap. DO NOT USE if damaged.

01

Unwrap your Tulips & Tea baby wrap carrier and find the centre of the wrap by using the label as a guideline.

02

Place the label in the middle of your tummy, just below your breasts.

03

Take the two long pieces of fabric either side of the label in each hand and wrap it around your body towards the back.

04

Cross the fabric in the centre of your back and bring it over each shoulder to the front.

05

Tuck the two long hanging pieces of fabric underneath the horizontal section around your waist.

06

Pull the two hanging pieces tighter for the section around your waist to rise.

07

Cross the two hanging pieces over.

08

I advise that you make a double knot at the end before inserting your babies into the wrap. According to your own preference and size you can either tie it at the back or in the front, on your hip. Make sure that you are comfortable in the wrap before picking up your babies. Even out any areas that might have twisted whilst wrapping and make sure the material passes over the ball of your shoulder from the back towards the front, in order to distribute your babies' weight evenly.

09

Before carefully picking up your baby, supporting his or her neck, stretch out the piece of fabric closest to your body. Your baby should be facing towards you. Spread out the piece of fabric closest to your body so that it forms a 'hammock' for your baby to lie in.

10

Tuck your little one's legs into the bottom end of the 'hammock' and use the other fabric pass over the opposite shoulder to support the bum and feet of your baby. Lastly pull the label upwards to secure your baby and to cover up as much as you want.

I advise that you spread the passes over your own shoulders even more if it is too close to your neck, and so that your baby is not so tight against your body, ensuring he or she can breathe easily whilst drinking.
