

TWIN WRAPPING STYLE

INSTRUCTIONS

Hello, my name is Melissa. Having twins can be a daunting task! Having your hands free is even more important when having twins. Although you cannot wear your twins for as long as an individual baby, it surely keeps you sane for a while! Also, they like to be this close to each other, and close to mommy or daddy. I continued until they were weighing more-or-less 7 kg together, but it depends on what your back can carry.

I advise that you inspect your wrap prior to use for any signs of damage to the material which may compromise the integrity of your wrap. DO NOT USE if damaged.

01

Unwrap your Tulips & Tea baby wrap carrier and find the centre of the wrap by using the label as a guideline.

02

Place the label in the middle of your tummy, just below your breasts.

03

Take the two long pieces of fabric either side of the label in each hand and wrap it around your body towards the back.

04

Cross the fabric in the centre of your back and bring it over each shoulder to the front.

05

Tuck the two long hanging pieces of fabric underneath the horizontal section around your waist.

06

Pull the two hanging pieces tighter for the section around your waist to rise.

07

Cross the two hanging pieces over.

08

I advise that you make a double knot at the end before inserting your babies into the wrap. According to your own preference and size you can either tie it at the back or in the front, on your hip. Make sure that you are comfortable in the wrap before picking up your babies. Even out any areas that might have twisted whilst wrapping and make sure the material passes over the ball of your shoulder from the back towards the front, in order to distribute your babies' weight evenly.

09

Use each sling to support each baby's back and bum, over each breast, in an upright position, facing each other, with one leg over the "x". First insert your one baby and then the other. Spread out each piece of fabric over their bum and back, and over their shoulders, supporting their neck. The fabric will form a 'hammock' for your baby to sit back into.

10

Tuck your little one's legs in whilst pulling the label upwards to secure your babies. You can pull the label up high, tucking in their arms and hands, this will secure them even more. Make sure they can breathe easily.

I advise that you spread the passes over your own shoulders even more if it is too close to your neck, or if your babies are too crowded.
